

INCLUSIVITY TOOLKIT : ASSESS AND STRENGTHEN YOUR INTERNATIONALISATION STRATEGY

23 January 2026

The GAP project consortium is pleased to announce the release of its **Inclusivity Toolkit**, one of its key deliverables.

In order to **better understand mobile and non-mobile student populations**, institutions can now assess their international strategy on the platform. Designed to be user-friendly, the tool provides **quick and easy access** to the information and allows for the filling in of only the most relevant information to the institution's situation.

Individuals who are directly or indirectly involved in the institution's internationalisation strategy may complete the form, as well as

access feedback that consolidates responses from all respondents.

To bridge the mobility gap, the toolkit provides institutions with the tools they need to **turn their reflections into action by identifying gaps, opportunities, and concrete areas for improvement**.

Click here to access the Toolkit
