

INCLUSIVITY TOOLKIT

Access the Inclusivity Toolkit

What is it ?

The inclusivity toolkit is developed for higher education institutions (HEIs) to explore the gap between mobile and non-mobile students and their inclusive practices in outbound student mobility.

Why is it needed ?

The barriers to student mobility are multifaceted and context-related, arising not only from the characteristics of the student population but also from the operational structures of higher education institutions themselves.

What is the objective ?

The toolkit supports higher education institutions in reconsidering their approaches to providing access to mobility and establishing or modifying their inclusive mobility agenda.
