The Policy Recommendations build on the research findings, discussions with mobility and inclusivity practitioners, and exchanges with European stakeholders throughout the project. They provide **concrete directions** for **improving inclusive student mobility** and **supporting institutional change**.

These recommendations bring together the experiences, ideas, and suggestions collected during the WP3 activities. In particular, the training held in Berlin generated valuable insights from both staff and students, ensuring that the recommendations address priorities identified by those directly involved in mobility programmes.

Together, these recommendations offer a **practical framework** for higher education institutions and policymakers seeking to make mobility opportunities more **accessible**, **equitable**, and **inclusive**.
The full Policy Recommendations are available for consultation and download on your left.
