

THE ERASMUS GAP PROJECT HAS BEEN LAUNCHED

The representatives of the project partners met in Versailles for the the kick-off meeting hosted by UVSQ – Université de Versailles Saint-Quentin-en-Yvelines on 24 and 25 October 2023.

2 days were filled with dynamic conversations, setting plans and discussions about ways to make student mobility more accessible.

Erasmus GAP aims to draw attention to the gap between students with realistic mobility opportunities and those without. The project will take the discussion about accessibility of student mobility a step further to help develop inclusion instruments on different levels to fully seize the importance of this gap and its negative impact on social inclusion.
