

RECOMMENDATIONS FOR HIGHER EDUCATION INSTITUTIONS

The recommendations for higher education institutions provide guidance for a successful process of change in terms of inclusion by translating individual experiences into institutional processes. The recommendations outline the appropriate steps for the general implementation and use of the data design and web tool, and advise on how to adapt it to different institutional contexts.

The experiences of study visits and training sessions, focusing on in-depth trials of the tools, will be integrated into the recommendations.

The recommendations will be available by the end of 2025.
